# Introduce PC Building to Beginners

1

## Build a Custom PC

User can choose PC parts based on type: Productivity, Gaming, or Workstation

2

## List will be built for the user

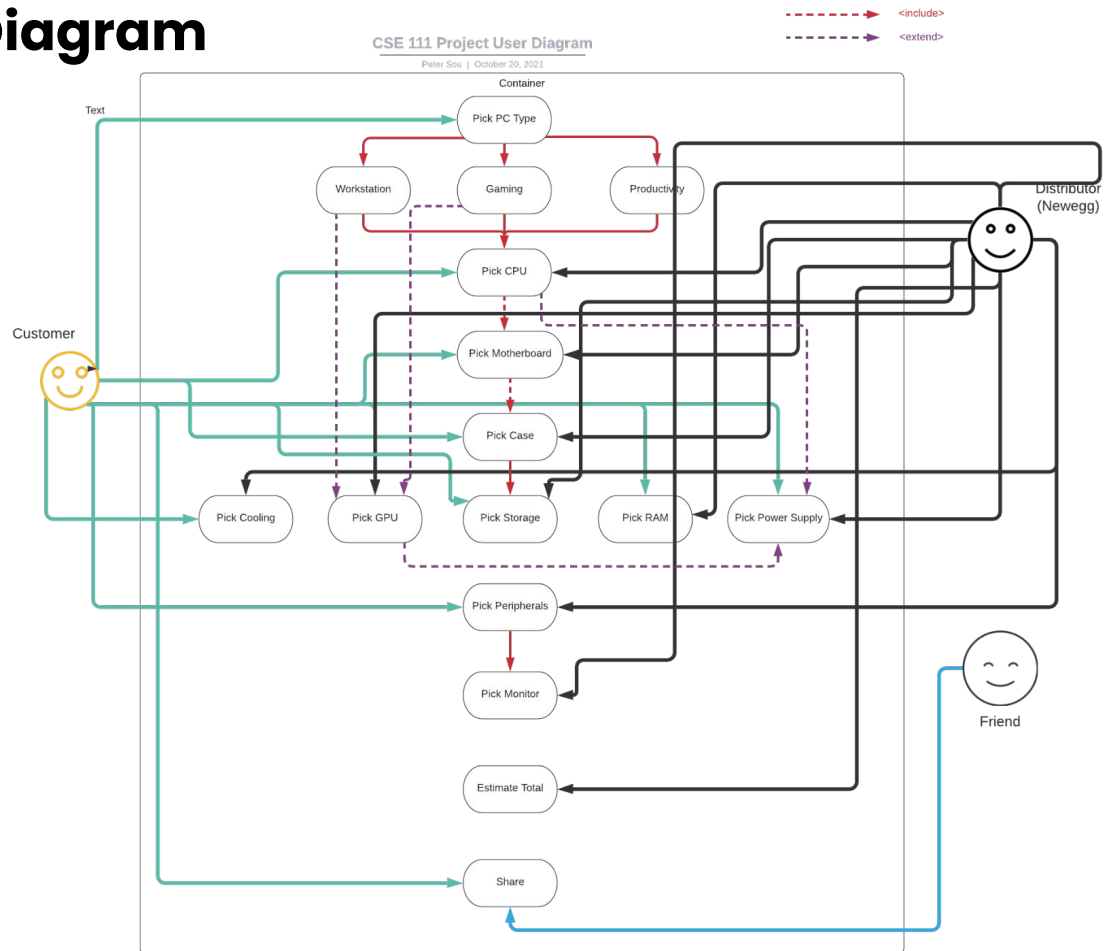

The internal builder will make sure parts are compatible with each other, giving a final list and estimated total price

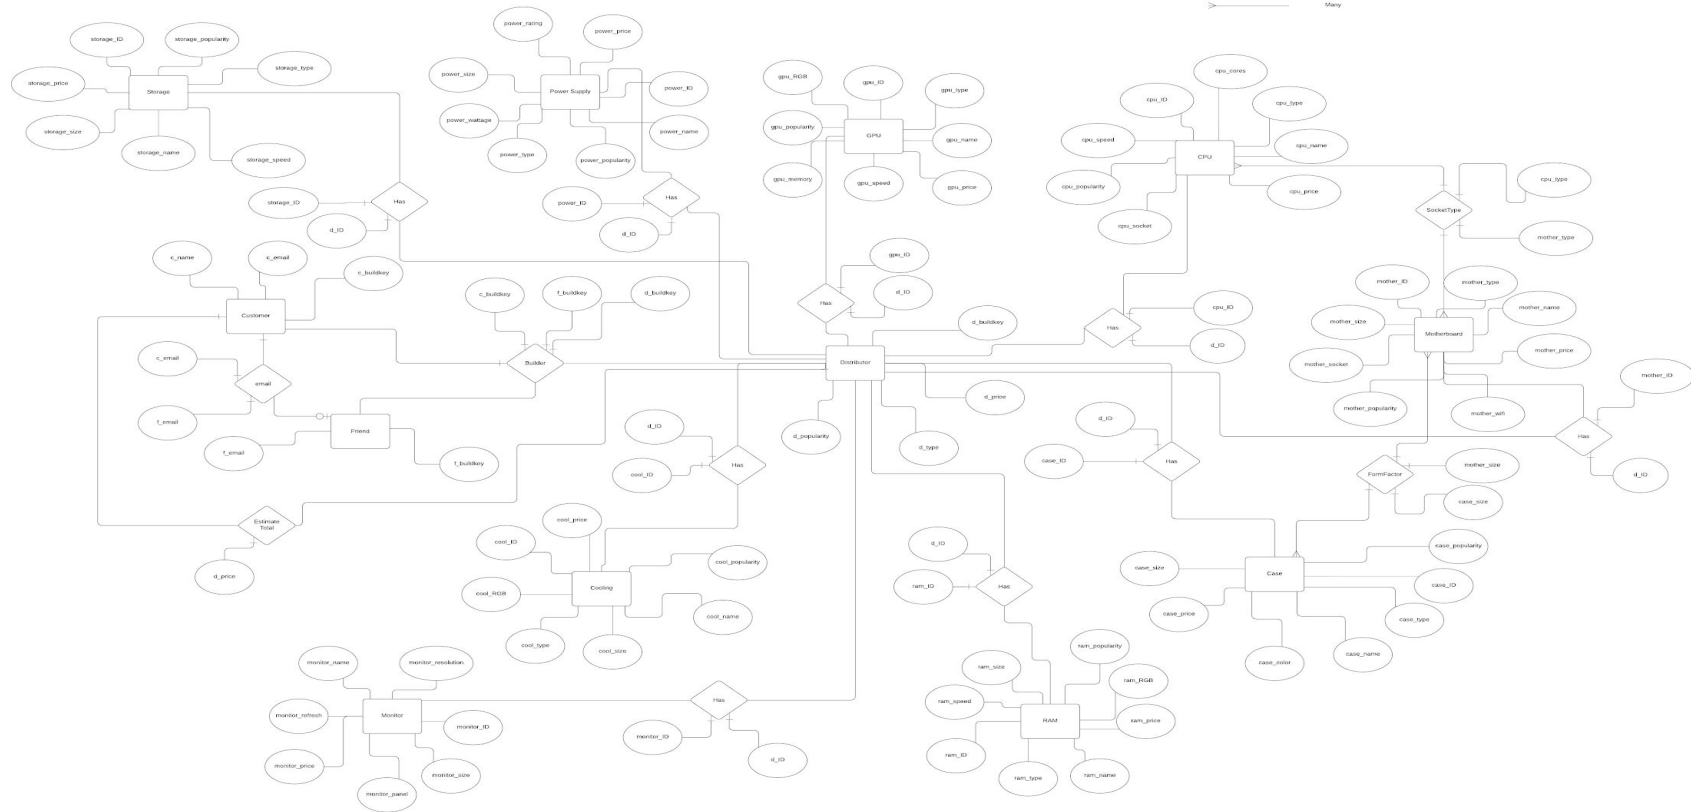

3

## User can share build with a friend

User can share builds with other friends via email

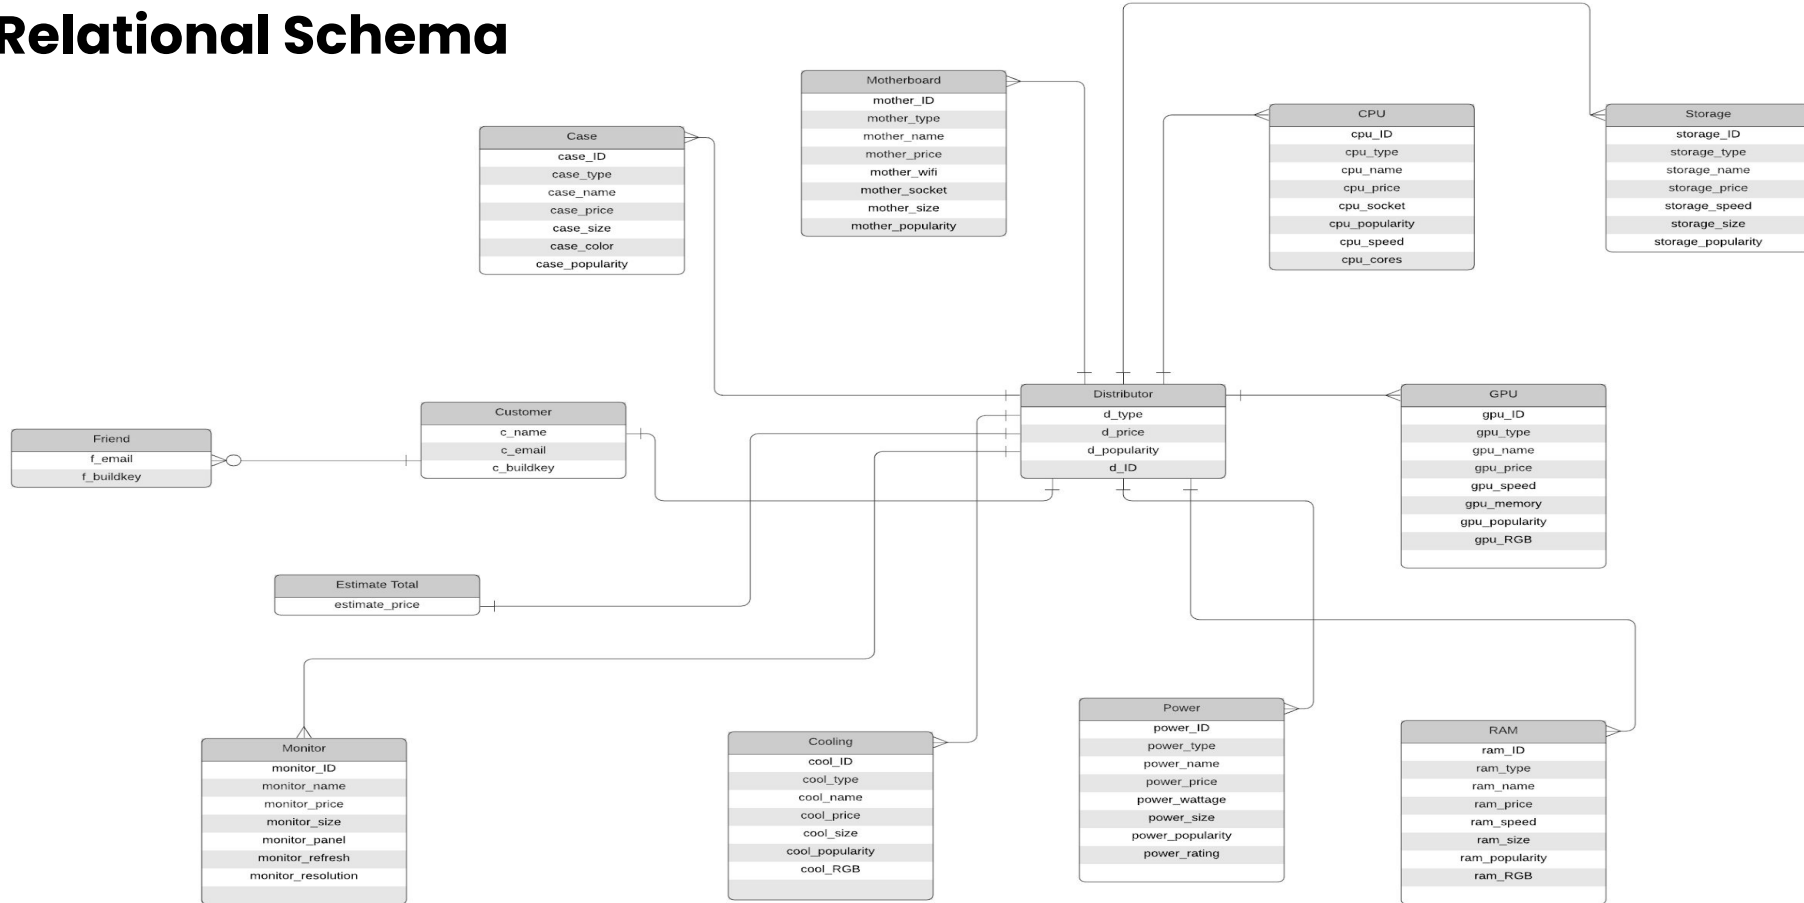

# User Case Diagram

# E/R Diagram

# Relational Schema

A series of four concentric circles in a light gray color, centered on the left side of the slide.

# Credits

Special thanks to all the people who made and released these awesome resources for free:
